Excellent, thanks Greg!

For Cavill, I have attached the most current layout that Mike would like. Trying to balance preserving FP-35 with giving him some yard space for his house, along with some separation from a future house on lot 3.

With this layout Mike would have the driveway from Barlow all the way up to his house on his lot, the shed at the bottom on his lot, and the stormwater basin that was built for the driveway.

His existing house on lot 1 must be included in the CSM and rezoning because it drops below 35 acres.

Hope that works, let me know if you have suggestions.  
rrk

Ron

Adopted plan amendment last night re: Cavill - haven't looked at rezone from earlier but would be helpful to minimize impact on FPN zoned land.

Approved Johnson drive; no need for culvert; will forward paperwork soon

Greg

Magically sent through thin air
